PREFACE

Up to and including the year 1907–08 it was customary to print a list of the graduates of the College and of the Theological Seminary in the annual issues of the University catalogue. In the year 1912 there was issued a *Statistical Catalogue of the Students of the Collegiate and Theological Departments of Lincoln University.* Of this catalogue the present publication, with the name changed to Biographical Catalogue, is a second edition, revised and corrected so far as possible to date.

Several new features should be noticed. The students are arranged not alphabetically (except in the general index at the back), nor by year of matriculation, but in their proper classes, although in some cases, especially with the first few classes, it has been impossible, owing to lack of records, to make an accurate classification. The classes have been divided into two parts, those who completed the course and received a degree, and those who did not. In the case of the latter the letter b is printed after their names in the general index at the back. A compact system of abbreviations has been adopted which it is thought will be self-explanatory. The biographical notes are printed once with each name, viz., where it is mentioned in the department, college or theological seminary, first attended.

Thanks are given to the professors, alumni, and students who have helped in the compilation of the present volume. An effort has been made to make everything as accurate as possible. Corrections and additions should be reported at once to the undersigned.

John B. Rendall.
